**YOUR GUIDE TO THE MOST MEANINGFUL ASTRO EVENTS
& NOTEWORTHY NUMEROLOGY DAYS OF 2020!**

 Numerologist

...And it's arrived! Welcome to 2020, and the 4 Universal Year!

It's time to buckle up, star-seekers, as life's about to feel very different from the last 12 months.

In Numerology, each calendar year holds a specific energetic frequency, which affects everybody living on the planet.

2019 was a 3 Universal Year ($2 + 0 + 1 + 9 = 12$, and $1 + 2 = 3$), so it was full of bright and breezy, creative and expressive vibes.

We're guessing you spent the year honing your communication skills, flexing those artistic muscles, and setting that inner voice free? Or has the last 12 months felt more like you were constantly bouncing from one crazy idea to the next and speeding around like a social butterfly on steroids?!

The energy of a 3 Universal Year can be insanely productive, but also overwhelmingly intense. So take a breath, and get ready for something different.

Energy of the 4 Universal Year

Above all, the energy ushered in by this brand new year offers focus. Gone are the days of scattered attention and distractions to the max! 4 energy is

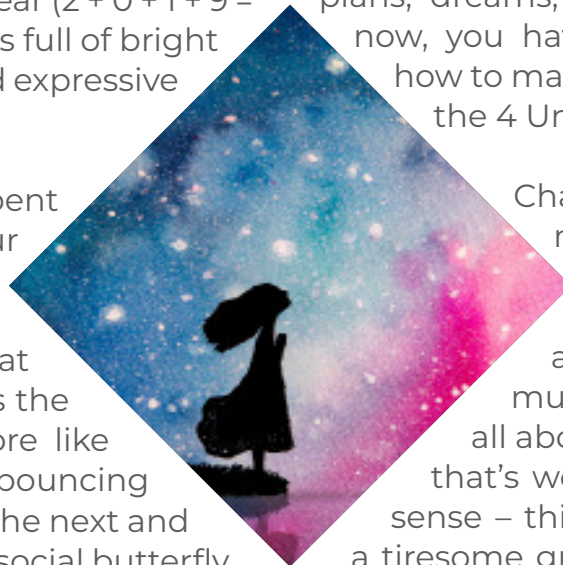

grounded, logical and methodical. So you'll be in a great position this year, to finally ground all of those bustling thoughts and ideas of 2019, and begin to build something of real value.

Building foundations is something that 4 energy excels in.

Picture the square – with its sturdy corners and symmetrical form. This strong and endlessly useful shape could be the 4 Universal Year's mascot! It's the ideal container for all of those fly-away plans, dreams, and visions that, until now, you haven't quite figured out how to manifest into your life. Well, the 4 Universal Year is how.

Characterized by meticulous planning, attention to detail and its step-by-step approach to pretty much everything, the 4 is all about getting to work. And that's work in the best possible sense – this year isn't going to be a tiresome grind into the ground, so don't worry!

The number 4 is where work becomes satisfying. Rewarding. And pretty darn profitable if you play your cards right.

YOUR GUIDE TO 2020

Your finances and career will likely get a bit of a spring clean over the next 12 months. You'll have the stamina, strength, and commitment to look towards playing the long game, instead of just getting by day-to-day. So schedule in that appointment with a pension advisor... life's about to get juuust a little bit more grown-up than last year!

But it's not all about the serious stuff! The energy of this 4 Universal Year is also about friends, family, and community. Interdependency (that's as opposed to co-dependency) will take the spotlight this year. Whether its mentoring, skill-sharing, clothes swaps, or babysitting rotas (and everything in between) this year will ask you to step up and participate in your neighborhood niceties.

Trust and loyalty is at an all-time high. So let's all stop rushing around for a hot minute, and get present with the people we care about. This will be a wonderful time to anchor into the bedrock of the community around you. Get ready to root in deep – the folks you join hands with this year could be friends for life.

On the flip side, the details-focused energy of a 4 Universal year can tend to turn your gaze to your limitations, rather than your bounty. Instead of the eyes-wide optimism of the number 3, under the 4 we can all tend to narrow down our sense of possibility.

Instead of seeing opportunities, we see the reasons "why not". Instead of our accomplishments, we see our "failures" (though the more enlightened side of the number 4 knows that there are no such things as failures – only more opportunities!)

Bear this in mind this year, though, and catch yourself if any feelings of negativity and lack start to bubble up. A very good strategy – and the number 4 sure loves strategy! – is to create plans, charts, rotas, and checklists galore. Not only will these all combine to keep you on track, but you'll be able to see your progress. Ticking off your to-do-list, and comparing this month's productivity levels with the last, may sound high-maintenance, but you'll sure get a boost when you see your progress!

Another method for mastery with this number is holding an attitude of gratitude. Remember the "container" of the square? Keeping high-vibe, and staying as thankful as you can, will turn this most fill-able number into a magnet for abundance!

This, coupled with the disciplined effort that the number 4 brings could see 2020 being one of your most successful yet!

So let's get started!

JANUARY

5 Universal Month (1 + 2 + 0 + 2 + 0 = 5)

THE 5 UNIVERSAL MONTH

January brings a supremely dynamic start to the year!

Whilst the overarching energy of this 4 Universal Year may have you leaping onto the treadmill from day 1, the numerology of January has other plans.

The 5 is adventurous and needs change and variety. So as we enter into the year, and those “back-to-school” vibes hit, the first mention of “work” and “routine” could see you running for the hills! Be warned and create enough diversity in your days to stop you from going stir-crazy.

Collectively, this month's 5 Universal energy is set to ring in the changes, and will likely demand that you embrace whatever appears! So if you've been sliding into a winter slump (or in the Southern Hemisphere, getting a little lethargic as late summer hits) this is your wake-up call... Are you listening?!

It's time to expand those horizons, and shake things up a little.

What are you willing to do differently this month?

Where has life gotten a little stagnant and repetitive?

Where have you lost your sense of childlike wonder?

Start the year off with a little sprinkling of magic – 5 energy loves synchronicities and serendipitous happenings, so open your eyes, and they'll appear!

JANUARY 2020 - THE BREAKDOWN

1 JAN: 1/1 NUMEROLOGY POWER DAY

The New Year gets a boost on the 1st, with its very first numerology power day! 1/1 gives you clear insight and can even magnify your psychic gifts, so tap in closely. Decisions you make today, based on that inner compass, will be sure to send you in the direction of success.

10 JAN: FULL MOON & LUNAR ECLIPSE IN CANCER

The first Full Moon of the year is also the most emotional. Cancer comes first in the Zodiac's water trilogy, holding a wondrously maternal, though highly sensitive vibe.

Full Moons illuminates our shadows, so be super-wary of any eruptions around family and past relationships. Add a lunar eclipse into the mix, and those shadows go deeeep. Be sure to nurture yourself and use this opportunity to release past resentments and hurts. Clearing out the emotional cobwebs will serve you SO well, as the year is only just beginning...

6 JAN: 11/1 NUMEROLOGY POWER DAY & URANUS GOES DIRECT IN TAURUS

An auspicious day in the cosmos, as Uranus, the great "Awakener" finally stations direct after a four-month retrograde through earth-bound Taurus. On the very same day as 2020's second numerology power day.

The revolutionary planet's influence will be intensified today, so don't be surprised if you feel like shattering a few illusions (and just a couple of plates and dishes!). Just be sure you're not inadvertently self-sabotaging.

11/1 brings a heightened sense of creativity, and a time of rapid manifestation. Stay conscious of your thoughts and feelings, and focus on the highest outcome for all.

12 JAN: SATURN CONJUNCT PLUTO

One of the year's most notable planetary conjunctions happens early on, as structured Saturn and deep-delving Pluto align. Both planets are to be feared when flying solo; and together, they're a veritable disaster movie. Keep your most level-headed bestie

on close hand, as the first sign of trouble could get blown out of all proportions (and don't say we didn't warn you!).

20 JAN: SUN ENTERS AQUARIUS

Time to wave goodbye to Capricorn season for another year and welcome in some solar vibes from Aquarius! The water bearer brings in a gust of fresh air as we're all encouraged to embrace our uniqueness, and shine that authentic light brightly!

As the zodiac sign of the freedom fighter, the next 4 weeks could see you campaigning for social justice and fighting for the cause you believe in most.. can you chose one? It's time to shake up the system: Vive la revolution!

24 JAN: NEW MOON IN AQUARIUS

As Sun and Moon come together in Aquarius, we're all invited to set intentions for the collective. Teamwork comes top of the agenda, so why not group together with a couple of likeminded folks, and amp your magic up to the next level?

With Uranus, Aquarius' ruling planet is now back on track and moving forward once again, there's no stopping this wild, and eccentric sign.

Be sure you don't get too ungrounded. Tech could send you into a spin - be sure to put those devices down & give your mind a rest.

25 JAN: CHINESE NEW YEAR OF THE METAL RAT

A new beginning of a different sort comes just a day later, in the shape of the Chinese New Year of the Metal Rat! As the very first animal on the Chinese horoscope, Rat is associated with renewal and beginnings. If you were a little late getting your NY resolutions pinned down, then this is your second chance!

With its expensive taste and love of opulence, the year of the Rat looks set for the high life. Just make sure any investments are well researched and planned.

FEBRUARY

6 Universal Month (2 + 2 + 0 + 2 + 0 = 6)

THE 6 UNIVERSAL MONTH

The energy of February is set to feel SO MUCH softer and more stable than the upheaval of last month, as home, family, and friends take precedence.

The stage is set for domestic bliss and harmony, so picture yourself happily feeding a babble of friends around the kitchen table and you'll be about right. Just don't drive yourself into a frenzy trying to get everything just right...

The shadow side of the number 6 vibration is perfectionism. So nit-picking and critical behavior may rear up its ugly head if you're not careful.

The antidote to this is an abundance of self-care. Focus on self-nurturing practices this month, especially tactile, pleasure-filled activities like massage and hot baths steaming with an infusion of essential oils.

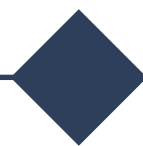

COSMIC EVENTS

1 Feb	Imbolc
2 Feb	2/2 Numerology Power Day
9 Feb	Full Moon in Leo
17 Feb	Mercury Stations Retrograde in Pisces
19 Feb	Sun enters Pisces
22 Feb	2/22 Numerology Power Day
23 Feb	New Moon in Pisces

And whilst you're at it, why not bathe with your beau? The 6 is also the number of lovers – so be sure to schedule in some quality time with your S.O. this month. Still looking for yours? Then this could be the month you get lucky!

Also worth noting this month – the 2/2/2 number code that makes up this 6 Universal Month is a sacred sign of deep spiritual connection. Been trusting your intuition lately? Don't take yours for granted – flex those psychic muscles, ok?!

FEBRUARY 2020 - THE BREAKDOWN

1 FEB: IMBOLC

The first day of Feb always coincides with the ancient Celtic fire festival of Imbolc. Celebrate the coming Spring with a simple fire ceremony to banish the darkness (and phew... it's been a long time coming!)

In the Southern Hemisphere, it's your turn to celebrate Llamas – the first harvest – with deep gratitude instead.

2 FEB: 2/2 NUMEROLOGY POWER DAY

Not your regular 2/2.. this is a 2/2/22 numerology power day! Possibly the second most psychically connected day of the entire year (see later this month) this is your opportunity to tap into Source like never before. Ask Spirit your burning questions, and listen in deeply for the answers.

The veils are thin, so make the most of it today.

9 FEB: FULL MOON IN LEO

A glorious Full Moon in Leo roars into the night sky on Feb 9th, bringing with it a big warm glow of heart energy.

Opportunities to take up the role of leader could come your way, as this energy is all about being a bright example. So shine brightly as your most authentic self. If Leo can teach you anything, it's that being less than your wholly authentic self is an insult to the universal forces that brought you here! SO let's get unapologetically real!

17 FEB: MERCURY STATIONS RETROGRADE IN PISCES

Uh oh... the first Mercury Retrograde of the year hits in the water sign of Pisces, not a pleasant combination! With the trickster planet of communication and connectivity backtracking across the skies for three long weeks, it's time to back up your hard drive and triple-check those travel plans.

Plus, stay extra vigilant for any sudden emotional outpourings (thanks, Pisces).

19 FEB: SUN ENTERS PISCES

As the Sun joins Mercury and enters dreamy Pisces, life could begin to feel a little, hmm.... More emotional!

Watch those empathy dials closely – Under Pisces, we all tend to soak up other people's energy like sponges, so boundaries, people, boundaries!

This is also the solar season that brings closure. Whilst the calendar year is only just picking up speed, the astrological year is entering its final lap. So this is a great time to release anything you didn't manage to kick to the curb at NY.

22 FEB: 2/22 NUMEROLOGY POWER DAY

And here it is. The year's only 22/2/22 numerology power day! SO many multiple 2s can only mean one thing – sensitivity and empathy are amped up to the MAX.

Use this to your advantage – pull cards, read the runes, crystal gaze - whatever floats your divinatory boat gets extra points for accuracy today.

BUT.. if you're already a sensitive soul, you may want to go hide under a rock 'til it's over. Just sayin'.

23 FEB: NEW MOON IN PISCES

Just one day later, the New Moon hits in super-sensitive Pisces. (So probably staying under that rock a while longer's an idea ;)

Or if you're game, set intentions for clearer boundaries with other people. Strengthen your auric field using a water spritzer with essential oils such as basil, rosemary, and vetiver.

MARCH

7 Universal Month (3 + 2 + 0 + 2 + 0 = 7)

THE 7 UNIVERSAL MONTH

Ok, time to check back in.

The energy of a 7 Universal month is all about introspecting (which isn't the same as self-obsessing, btw). So take that foot off the gas for a hot minute and look within. The number 7 needs you to ask yourself the big questions, re-orient your focus, and figure out whether the desires you hold in your inner world are lining up with how your outer world currently looks.

It will be important to schedule in plenty of alone time (which could feel like a welcome break from all those family gatherings last month!) and why not buy yourself a new journal? You'll likely be buzzing with ideas and join-the-dot connections by the time the month is out, so be kind to yourself, with a special place to jot down and make sense of it all!

COSMIC EVENTS

- 3 Mar** 3/3 Numerology Power Day
- 9 Mar** Full Moon in Virgo & Mercury Stations Direct
- 14 Mar** Pi Day!
- 19 Mar** Sun enters Aries
- 19 Mar** Ostara (Spring Equinox)
- 21 Mar** Saturn enters Aquarius
- 24 Mar** New Moon in Aries
- 30 Mar** 3/30 Numerology Power Day

But it's highly important not to rush into action during a 7 Universal Month. Sure, you could feel the burning desire to get those plans off the ground, but listen in a bit more closely... the cosmos is telling you to slow. Right. Down.

As a month of learning, and not doing, you'll likely have to backtrack over any ground you do cover. You have been warned!

MARCH 2020 - THE BREAKDOWN

3 MAR: 3/3 NUMEROLOGY DAY

The threes line up in this Numerology power day, enhancing creativity, self-expression and a whole heap of fun and games! As the number of the child, the 3 encourages us to lighten up and smile – what will you do today, to bring out the kid inside?

9 MAR: FULL MOON IN VIRGO & MERCURY STATIONS DIRECT

An energizing day as the Full Moon rises in efficient and organized earth-sign Virgo. A great time to finish up any projects you've been working on, as Full Moons bring completion and closure.

On the same day, this Full Moon's ruler, the planet Mercury finally stations direct. So let's all breathe a collective sign of relief (in... and out....!) as wires uncross and communication clarifies.

14 MAR: PI DAY!

Numerology's geekiest annual celebration! Pi is one of life's greatest mysteries – an irrational number that starts 3.14... goes on and on and on!

Celebrate by composing a poem about pi, making some pi art, baking your friends a pi or running races of 3.14 miles!

20 MAR: SUN ENTERS ARIES (START OF ARIES SEASON) & OSTARA (SPRING EQUINOX)

The Sun swings into the very first sign of the Zodiac, marking the astrological New Year and the start of Aries season!

With this fresh burst of firepower, it's time to spread your wings and set your sights on new horizons! (And yes, this month's 7 Universal energy does put the dampers on a little, so use your intuition about how high you fly).

Aries teaches us radical self-trust, and confidence. Could you do with a little more? Then push yourself out of that comfort zone – prove you can do it!

*In the Southern Hemisphere, Autumn Equinox has arrived, so for you, Aries blazes a trail into the darker solar seasons with no less firepower!

21 MAR: SATURN ENTERS AQUARIUS

Saturn resides in a single sign for around 3 years, but over the next few months (until July) makes an unusual, fleeting visit to Aquarius.

Expect boundaries to loosen, and responsibilities to lighten (thank Goddess!) as Aquarius softens the edges of the fiercest of planetary taskmasters!

24 MAR: NEW MOON IN ARIES

As Sun and Moon line up in powerhouse Aries, the New Moon brings an opportunity to sow seeds of powerful intent.

The Moon's energy here encourages us to believe in ourselves – it's time to propel yourself and the world forward without looking back!

What do you want?

What's your plan?

What's your vision?

Aries flies solo, so this isn't about what anyone's expecting of you, it's about going all in, and asking yourself What LIFE do I choose?

30 MAR: 3/30/3 NUMEROLOGY DAY

The month's second numerology power day, as the threes align once more.

You'll feel a powerful, expressive surge of energy from the cosmos, as we're all encouraged to get creative and release that inner muse!

Say how you feel!

Sing it out loud!

Get that energy flowing through your body!

APRIL

8 Universal Month (4 + 2 + 0 + 2 + 0 = 8)

COSMIC EVENTS

4 Apr 4/4 Numerology Power Day

4 Apr Jupiter conjunct Pluto in Capricorn

8 Apr Full Moon in Libra

19 Apr Sun enters Taurus

23 Apr New Moon in Taurus

25 Apr Pluto Stations Retrograde in Capricorn

THE 8 UNIVERSAL MONTH

This month's focus is on self-empowerment. And the way to get there is through expansion.

After March's introspective 7 energy, it's time to set into motion all that knowledge you uncovered... Which means it's time to get busy! The 8 brings SO much strength and determination to do, well, pretty much anything you choose. So choose wisely. Such an abundance of dynamic, high-vibe energy codes this month could easily scatter if you don't get your focus laser-sharp from the get-go.

So what are you going to manifest? What purpose are you going to commit to?

Echoing the powerful, overarching 4 energy of this 4 Universal Year, April (the 4th month) also reminds us to tend to the details and get those foundations ship-shape.

This is no time to cut corners. So be firm about what you want, and put the hours in.

As the number of wealth and prosperity, this 8 Universal month is set to bring you the financial rewards that you deserve, but not if you're looking the other way! So remember to stay open and receptive as you put your cogs into motion over the next 30 days – all work and no play is not how this game works!

APRIL 2020 - THE BREAKDOWN

4 APR: 4/4 NUMEROLOGY POWER DAY

A potent reverberation of the number 4 occurs on the 4th day of the 4th month of this 4 Universal Year! 444 brings in the Ascended Masters so Divine Energy surrounds us all today.

Luck and determination collide in the Jupiter/Pluto conjunction, happening for the first time in 13 years! (Though due to the retrogrades, their paths will cross twice more this year). Forming a planetary aspect of such immense drive and determination, today holds an energy that's been unmatched in a decade.

8 APRIL: FULL MOON IN LIBRA

A soothing and emotionally balanced Full Moon rises on the 8th, illuminating the art and beauty in your life. Seek out things that please the eyes – go to a gallery, find hidden gems of stunning architecture in your city, or a scenic vista to gaze over.

Also, a great time to rearrange the furniture and shake up the energy in your home to welcome in a breath of fresh air!

19 APRIL: SUN ENTERS TAURUS (START OF TAURUS SEASON)

The flames subside as Aries season is put to bed for another year and sensual Taurus takes over. Root in over the next 30 days with good food, good company and a slower pace of life.

Taurus rules material wealth and abundance, so use this solar season as a chance to welcome more of what you love into your life. How? Gratitude, gratitude, gratitude!

20 APR: NEW MOON IN TAURUS

Sun and Moon collide in the sign of the season, as the New Moon hits in the sign of her exaltation! For you and me, this means a steady ride and a potent opportunity to sow some seeds of powerful intent.

Don't forget Taurus' ruling planet Venus is the mistress of money and abundance. So if this is the year you planned to make it rich, then harnessing this New Moon's energy is a chance you can't miss.

25 APR: PLUTO GOES RETROGRADE IN CAPRICORN

The smallest planet in the solar system (ok, Pluto's officially a dwarf planet, but we're not picky) kicks into reverse for its annual 5-month retrograde. Shadows may rise, as it's less easy to resist being triggered. But this is where the healing happens, peeps! So be kind to yourselves.

MAY

9 Universal Month (5 + 2 + 0 + 2 + 0 = 9)

THE 9 UNIVERSAL MONTH

May brings a 9 Universal month which is a gift in so many ways! But we're not pretending here -when you're in the midst of a 9 month, it can feel like quite the opposite...

As the end of the numerical cycle, the 9 brings closure. The best way to deal with this energy is to trust it, so whatever is coming to a natural ending in your life... let it go!

Maybe a person is destined to leave your life this month? Maybe a job or work project will reach its conclusion? Maybe it's an emotional pattern or a behavior or habit that's no longer serving you?

With no less than three planetary retrogrades all kicking into gear this month, the cosmic support is there, to tie up any loose ends before you move on and look forward to freedom. And whilst this may feel a little tedious, there are lessons to be learned and knowledge to gather.

COSMIC EVENTS

- 1 May** Beltane (May Day)
- 5 May** 5/5 Numerology Power Day
- 7 May** Full Moon in Scorpio
- 11 May** Saturn stations Retrograde
- 13 May** Venus stations Retrograde
- 14 May** Jupiter stations Retrograde
- 20 May** Sun enters Gemini
- 22 May** New Moon in Gemini

Be thorough. If you don't give yourself ample time to thoroughly integrate the reactions and consequences caused by your life experiences, the same old stories will just keep playing out. The 9 comes to remind us that we move through spirals of growth, but we evolve through each and every one.

So this month, it's time to release the past in readiness for the bright new future that's awaiting you!

MAY 2020 - THE BREAKDOWN

1 MAY: BELTANE (MAY DAY)

The party starts with Mayday, also known as Beltane, the Celtic cross-quarter festival of Spring. Celebrate this ancient power-day with a sacred fire, a pleasure ritual or by gathering a bunch of wildflowers to honor the fertility of nature! *In the Southern Hemisphere, Samhain is the equivalent feast day, so honor your ancestors as the light fades.

5 MAY: 5/5 NUMEROLOGY POWER DAY

Angel Number 55 shows up on the calendar today as the spirit of adventure and freedom ripples through the collective! So let yourself off the hook if that routine slips, and get spontaneous!

7 MAY: FULL MOON IN SCORPIO

Time for a change? Steamy Scorpio rules transformations, so under this Full Moon anything could happen! Water signs enhance the emotions we feel, so expect intensity. Any unexpressed feelings will likely be illuminated (we're talking yours and other people's). And yes, emotional outpourings aren't everybody's cup of tea, so keep compassion levels high if you end up being someone's shoulder to howl (ahem, cry) on.

Soothe yourself (and fraught feelings!) with a Full Moon bathe or even a dip in the ocean.

11 MAY: SATURN STATIONS RETROGRADE

Still in the revolutionary sign of Aquarius, structured Saturn kicks into reverse for its annual 4 month retrograde.

It could feel like the brakes are on, as roadblocks stand on your pathway to success (and pretty much anywhere else you were headed). Resistance to this planetary powerhouse is futile however, so slow yourself down and try to re-group whilst you have the chance. This is your opportunity to comb through details, fine print and agreements to make sure those foundations you're building on are rock-solid.

13 MAY: VENUS STATIONS RETROGRADE

The amorous planet of love and beauty hasn't slipped into retrograde for over a year. Yet for the next 6 weeks, our relationships will be tested and romance re-evaluated. Ensure you emerge on top by getting real about your feelings and (with the help of current sign Gemini's gentle embrace) communicating with tact.

14 MAY: JUPITER STATIONS RETROGRADE

Yikes, the third planetary retrograde in less than a week hits as Jupiter joins the party, skipping back through the last few degrees of Capricorn.

When the solar system's good-luck-guy spins into retrograde, we can feel a little less than optimistic for a change. But instead of letting FOMO take over (no, not everyone's telling it like it really is over on Insta), try counting those blessings for what you DO have.

20 MAY: SUN ENTERS GEMINI

The Sun switches signs, entering light-footed Gemini for 30 days of social fluttering and breezy communication. So let that tongue loose, as this is the ideal time for networking, speed dating and chatting to whoever you sat next to at the bus stop.

Keep a notebook close, as you'll want to jot down every new idea that springs to mind, not to mention doodling for England – the abundance of nervous energy this season can bring means any fiddling tendencies go into overdrive!

22 MAY: NEW MOON IN GEMINI

Sun and Moon come together in quick-witted Gemini, inviting in a new cycle of conscious communication.

Use this lunation to re-address your self-talk, and your habits of expression with other people too. Are the words you use positive and affirming? Or are they derogatory and limiting?

Keep a journal of notes, to unravel the patterns in your day-to-day wordplay.

JUNE

1 Universal Month (6 + 2 + 0 + 2 + 0 = 10, 1 + 0 = 1)

THE 1 UNIVERSAL MONTH

As we launch into June, a new Universal cycle begins and the fresh, initiating energy of the number 1 takes over!

The 1 brings passion, creativity and the trailblazing attitude of all-or-nothing adventure.

This opening of the cosmic chrysalis this month puts you in a really strong position to start something new. Or better still, break away from the herd and take up a position of leadership. The world needs independent thinkers (and do-ers) - are you ready to put yourself out there?

A renewed sense of direction for most means that all your favorite people will likely be more personally driven than

COSMIC EVENTS

collectively focused. This isn't selfish, it's just that priorities this month, are on number 1 (literally).

At times you may feel a little isolated (whilst at others, it'll be a delicious relief to be 'going it alone!'). Don't take it personally if your sense of community dwindles, as your friends go off the radar. They'll soon return when July hits...

JUNE 2020 - THE BREAKDOWN

5 JUNE: FULL MOON & PARTIAL LUNAR ECLIPSE IN SAGITTARIUS

An easy start to June gives way to an intense lunation in the free-spirited sign of Sagittarius. The Archer rules expansion, knowledge, and travel, so any sticky spots around these areas of your life look set to be illuminated under Lady Luna's gaze.

Feeling stuck? Lackluster? In need of a change? Use this Lunar eclipse to release any sense of constriction, as fire-sign Sag gives you wings!

6 JUNE: 6/6 NUMEROLOGY POWER DAY

The sixes align to bring nurturing vibes to the cosmic playground, as we're all encouraged to shower a little love on our friends, our families and of course, ourselves! Is self-care a sacred practice in your life? Maybe it should be!

18 JUNE: MERCURY STATIONS RETROGRADE IN CANCER

The second Merc Rx of the year kicks off in soft and sensitive Cancer, lending a nostalgic air to the merry mayhem that we hope won't ensue over the next three weeks! Take our advice and make yourself a nest to retreat to – tech-free and easy to access. Avoid any game-changing plans, or mega-purchases until mid-July when the trickster planet goes direct.

20 JUNE: SUN ENTERS CANCER (START OF CANCER SEASON) & SUMMER SOLSTICE

The mid-point of the year arrives with the Sun's foray into maternal Cancer. Summer Solstice marks the longest day, so make the most of it – rise with the Sun, and why not set with it too?

*In the Southern Hemisphere, you're celebrating the winter solstice and the shortest day of the year, a potent day of release and renewal.

Cancer Season brings 30 days of emotional sensitivity. So if you're already living life on an emotional rollercoaster, well, it's about to ramp up a gear!

With the focus on family, yours will either be a welcome comfort or a hot mess of trigger points – know your limits! And don't push them too far. This is one season when that hard-as-nails crab shell exterior just might crack.

21 JUNE: NEW MOON IN CANCER & SOLAR ECLIPSE

Just a day after the solstice, Sun and Moon meet and a blackout in the skies brings personal and collective shadows to the fore.

Solar eclipses can be mighty revealing, so be ready for masks to fall, and truths to be unburdened. In Cancer, the focus falls to comfort and security, so don't be surprised if these anchor points get a reset. Make peace with change, as any transformations that come with eclipse season are always in the highest good of all (honest!)

23 JUNE: NEPTUNE STATIONS RETROGRADE

The planet of dreams and the subconscious joins the retro party this month, starting its five-month-long backpedal through home-sign Pisces. A time of murky misunderstandings or fantasies coming true? This planetary retrograde can be a tricky one to grasp as the veil between what's real and what's not, blurs.

25 JUNE: VENUS STATIONS DIRECT

Is your coupledness still intact? After six long weeks of lovers tiffs and romantic ruptures, the planet of love stations direct, and we can all make friends again! Expect more clarity and understanding from this point forward, where your closest relationships are concerned.

30 JUNE: JUPITER CONJUNCT PLUTO

The month comes to a close with the second of three potent Jupiter/Pluto conjunctions that we'll see this year. Creating the optimum conditions for success, this planetary alignment is just begging you to put your master plan into motion!

JULY

11/2 Universal Month (7 + 2 + 0 + 2 + 0 = 11, 1 + 1 = 2)

THE 11/2 UNIVERSAL MONTH

If you thought June was intense, then think again! July 2020 holds the vibration of the Master number 11, sending an altogether more powerful energy signature rippling through the collective.

Spiritual expansion and rapid growth are on the cards, as this month pulls us all up by our pants, demanding that we grow up. Experiences will likely feel intensified as, under this number's spell, we're being forced to learn our lessons fast. You could need to run a little faster too keep up – there's no time for waiting around!

Holding double the "1" energy of last month, any pioneering projects you have on the go will likely fly, as their momentum continues.

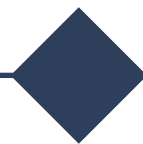

COSMIC EVENTS

- 1 Jul** Saturn (Rx) enters Capricorn
- 5 Jul** Full Moon in Capricorn & Partial Solar Eclipse
- 7 Jul** 7/7 Numerology Power Day
- 11 Jul** Chiron Stations Retrograde in Aries
- 12 Jul** Mercury Stations Direct
- 20 Jul** New Moon in Cancer
- 22 Jul** Sun enters Leo

Yet with an underlying "2" vibration (1 + 1 = 2) any egoic urges will have to be tempered. Relationships, love, cooperation, and coupledness all need to feature this month too.

So as much as anything, July is about the balance between you, and others. Between heart and head. Between what you want, and what you need.

JULY 2020 - THE BREAKDOWN

1 JULY: SATURN (RX) ENTERS CAPRICORN

Re-entering his home sign, Saturn makes his mark on the first day of July, backtracking into Capricorn. This will likely be felt like the heavy hand of responsibility and expectation bearing down (sorry... we did warn you July's a doozy!)

5 JULY: FULL MOON IN CAPRICORN & PARTIAL SOLAR ECLIPSE

The Moon joins the usual crowd of big players for Her cyclic climax in Capricorn (we're talking Jupiter & Pluto, plus newly arrived Saturn).

Here, though, the Moon is in her detriment so emotional expression doesn't come easy. Meaning feelings will either stay suppressed or erupt when you least expect it.

Get grounded as an antidote to any Full Moon mayhem, by barefoot walking outside or even using new earthing tech while you're sleeping.

7 JULY: 7/7 NUMEROLOGY POWER DAY

Number 7 energy amplifies through the collective field today. This number pattern carries with it a potent opportunity to dig beneath the surface and garner some signs and clues around your current situation. Information will be revealed, so long as you look in the right places.

11 JULY: CHIRON GOES RETROGRADE IN ARIES

A tiny asteroid that packs a mighty punch. In Greek Mythology, Chiron was known as the wounded healer, so when retrograde, he encourages a time of inner excavation. Your trauma and pain points are where your greatest potential and gifts lie. Do the healing, and you'll be able to offer these gifts to the world as a shining example! (Yes, we know we make it sound easy!)

Also coinciding with the 11th day of this 11 Universal Month, this could be a day of rapid personal transformation for you – are you game?

12 JULY: MERCURY STATIONS DIRECT

One in, one out. A day after Chiron turns Rx, Mercury stations direct in Cancer. Three weeks of communication breakdown comes to a close and we can begin to think clearly again! Phew...

20 JULY: NEW MOON IN CANCER

La Luna is reborn into her home sign – soothing and sensitive Cancer the crab, on the 20th.

As the new cycle starts, set intentions around home and security.

What makes you feel safe?

Who is your soul family?

Can you invite more of these into your life, with a conscious commitment to honor your personal needs?

22 JULY: SUN ENTERS LEO (START OF LEO SEASON)

The lion roars! Our solar king returns home for 30 glorious days of Leo power! Creativity and passion rule, as big heart energy gets a boost and we're all encouraged to shine.

The world becomes a stage this month, so ask yourself – are you putting on a good show?

Are you maximizing your talents? Expressing authenticity? Wearing the right costume for your character?

Leo season also encourages us to get a little playful – are you taking it all a little too seriously!?

AUGUST

3 Universal Month (8 + 2 + 0 + 2 + 0 = 12, 1 + 2 = 3)

THE 3 UNIVERSAL MONTH

Sunshine and delight reins supreme – hurrah! After the intensity of July and its Master Number 11 energy signature, August arrives to ring in the changes.

Artistic, and free-thinking, the number 3 creates a colorful canvas for the month.

Carrying echoes of last year's overarching 3 Universal energy, August is all about pleasure and joy (didn't quite get enough of it back in 2018? Here's another chance!)

Find ways to feel good.

Seek out ways to work because you love it, not because you have to – weave fun and games throughout your daily routine and remember to smile and see the positives.

| 19 Aug | New Moon in Leo |
| 22 Aug | Sun enters Virgo |

Communication is called into focus too – especially now we're out of the Mercury Rx Shadow. So this month, ponder - Are you speaking truthfully, to yourself, and others? Or are you mostly saying what you think wants to be heard? Three energy can struggle to discern between the two - so practicing authentic expression (ramping up the tact dial, obvs.) could bring you to a brand new level of emotional freedom.

AUGUST 2020 - THE BREAKDOWN

1 AUG: LAMMAS/LUGHNASADH

Our Celtic ancestors would celebrate the first harvest on Lammás (or Lughnasadh). Although times have since changed, this power day is an ideal moment to give gratitude for the year so far, and reflect on all that has passed.

*In the Southern Hemisphere, Lammás corresponds with the festival of Imbolc (Feb 1st in the North). So for our antipodean friends, the first fresh breath of is Spring entering in! Hurrah!

3 AUG: FULL MOON IN AQUARIUS

A bounteous lunation of liberation hits on the third day of this 3 Universal Month, amplifying this Full Moon's energy of unique self-expression! Aquarius is ruled by paradigm-shattering Uranus, making this an ideal time to throw a party or even host a Full Moon gathering in celebration of all things weird and wonderful. Don't hold back. Your uniqueness is exactly what the world needs!

8 AUG: LIONSGATE PORTAL (8/8 NUMEROLOGY POWER DAY)

The 8/8 Numerology Power day hits on August 8th, also known as the "Lionsgate Portal". A potent day of galactic alignment, the 8/8 code is connected to the star system of Sirius, and it's huge-hearted, big cat energy (no surprises we're bang in the middle of Leo season!)

Lionsgate marks the peak of a high-frequency energy stream that's in full flow from the cosmos for around three weeks – so take it extra steady today, esp. if you have star seed origins.

15 AUG: URANUS GOES RETROGRADE IN TAURUS

The great Awakener kicks into reverse for the rest of the year in grounded, rootsy Taurus. It's a slow, earth-shattering transit, that could take you by surprise in the coming months.

This rebel without a cause encourages thinking outside of the box, and a shake-up of routines. So if you're a fan of predictability, star-seeker, you may just have to loosen your grip a little.

19 AUG: NEW MOON IN LEO

Sun and Moon align in the sign of the Lion, encouraging self-affirming thoughts and a new round of intentions that align with your deepest heart's desires.

Let go of that monkey mind, and what your ego wants.

What will set your heart on fire?

What will make you fall in love with life again?

Put that at the center of your vision board this New Moon and manifest like crazy!

22 AUG: SUN ENTERS VIRGO (START OF VIRGO SEASON!)

Let the great decluttering begin!

On the 22nd of the month, the Sun moves into earth sign Virgo, the Zodiac's favorite organizational guru. Welcome to 30 days and nights of cleaning, clearing, and efficiency.

This mutable sign adores sorting through chaos, making this the ideal time to tackle all those projects you've been putting off all year.

Just be sure to make enough time for some R&R – an abundance of nervous energy (thanks to ruling planet Mercury, also in Virgo atm) could send you into a spinning mess by taking on too much than the 24 hours in each day will allow!

SEPTEMBER

4 Universal Month (9 + 2 + 0 + 2 + 0 = 13, 1 + 3 = 4)

THE 4 UNIVERSAL MONTH

2020s Universal 4 energy reaches its climax, with the arrival of the 4 Universal Month!

September amps up the structure, planning and manifestational magic that's been rippling its way through the year. That slow, steady pace and the diligent effort you've been putting in since January is finally set to come to fruition. This is the month that makes it all worthwhile!

4 is also the most resourceful of all the numbers – bringing you everything you need this month to succeed. Be sure to open yourself up to the abundance that's all around.

Doubled up, the 4 of this month, plus the 4 of this year equal the mighty 8, and in numerology, this points straight towards the big guns: Money, wealth, power and influence.

COSMIC EVENTS

- 2 Sept** Full Moon in Pisces
- 4 Sept** 4th Day of 4 Universal Month (of 4 Universal YEAR)
- 9 Sept** 9/9 Numerology Power Day & Mars Stations Retrograde in Aries
- 12 Sept** Jupiter Stations Direct
- 17 Sept** New Moon in Virgo
- 22 Sept** Sun enters Libra & Autumn Equinox
- 29 Sept** Saturn Stations Direct

But don't let this go to your head: use this month to root down, do the work, and do yourself proud. Plus, with two of the solar system's big players stationing direct later in the month, it'll begin to feel like the wind is at your back once again.

Also, be sure to look after your body this month, too. So much of manifestation is about creating a strong vessel to receive, so be healthy.

SEPTEMBER 2020 - THE BREAKDOWN

2 SEPT: FULL MOON IN PISCES

The month kicks off with a soft and dreamy Full Moon in Pisces – the Zodiac's very last sign. This is one of the best lunations in the entire year for releasing what no longer serves.

As a water sign, any way to incorporate this element into your rituals will make them especially potent. Try a ritual bath or shower (al fresco if you're game!) And keep hydrated – plenty of water will help you process those high Full Moon emotions!

9 SEPT: 9/9 NUMEROLOGY POWER DAY & MARS STATIONS RETROGRADE IN ARIES

This 9/9 Numerology power day invites in closure and release, as the number 9 comes at the end of the cycle. But importantly, this number brings regeneration. Whatever you commit to letting go of today, will be sure to create space for something even more wonderful!

Buuuuutt..... wait a hot second. Mars stations retrograde today!

That fighting, warrior spirit is turning inward, and sorry to say, but from now until mid-November, all deals are off. Don't initiate anything that you have high hopes for, and watch out for temper flares. Unprocessed anger could rear up for reckoning.

12 SEPT: JUPITER STATIONS DIRECT

But don't despair! Three days later, the solar system's biggest player hoiks into forward motion, stationing direct after 4 months of Rx action.

Any natal planets between 17° and 27° of Capricorn, and it could feel like Lady Luck is shining on you once again! For the rest of us, a little light risk-taking becomes de rigeur, and life will feel full of possibilities!

17 SEPT: NEW MOON IN VIRGO

The year's only New Moon in Virgo hits on the 17th, as routines, health and wellness come into focus.

Is your body a temple? Now is the time to take the motto to heart and treat your sacred vessel with the love and nurturing it deserves. Can you commit to a weekly self-care ritual? A sacred grooming practice? A health-giving home-spa once a month?

Virgo's mutable energy calls for action, and not just ideas and chat. Making it easy to follow through on intentions with practical steps.

22 SEPT: SUN ENTERS LIBRA (START OF LIBRA SEASON) & AUTUMN EQUINOX

The day hangs in the balance as the Sun enters the sign of the scales and a rush of light, bright air energy infuses the collective. Libra takes the high ground. This solar season is all about beauty, fairness and keeping life trouble-free.

As the Zodiac's peace-keeper, we're all more likely to meet over our similarities, than divide over our differences. So schedule in all important discussions, meetings or negotiations sometime over the next 30 days.

Also today, the Equinox marks the moment when night and day are equal around the globe.

In the Northern hemisphere, we welcome in the darker months. And in the South, light is winning – happy days!

29 SEPT: SATURN STATIONS DIRECT

And before the month is out, Saturn sneaks in with a little good news, declaring the end of his 4-month retrograde!

So pop that cork and pour yourself a glass of something sweet. This is one Rx that nobody misses when it's gone.

OCTOBER

5 Universal Month (1 + 0 + 2 + 0 + 2 + 0 = 5)

THE 5 UNIVERSAL MONTH

We have come full circle—January 2020 was also a 5 Universal Month, so this is the second burst of bounteous, freedom-seeking energy we've been feeling this year.

Wondering if it's time to start planning next year's holiday?
Or even a Christmas break?

One thing is for sure – if you don't create space for a little change and variety in your life, it'll come and find you anyway! So stay flexible and adaptable as you move through the next 31 days, and release any fear of the unknown.

With Mercury stationing Rx half-way through the month, double frustration could hit, as it feels like the cosmic brakes are firmly on. Try changing your perspective, before you throw the towel in and self-sabotage!

COSMIC EVENTS

1 Oct	Full Moon in Aries
4 Oct	Pluto Stations Direct in Capricorn
13 Oct	Mercury Stations Retrograde
16 Oct	New Moon in Libra
22 Oct	Sun enters Scorpio
31 Oct	Samhain (Halloween) & Full Moon in Taurus

The number 5 also calls on us to seek pleasure. Life must be lived through the senses this month. Be sure to move your body plenty - stretch out those muscles, wriggle those joints, and feel the full range of your movement.

Any nervous energy build-ups left unchecked will just leave you feeling even more restless and in need of a revolution!

OCTOBER 2020 - THE BREAKDOWN

1 OCT: FULL MOON IN ARIES

The month begins with a bang, with the Full Moon in fire-sign Aries on the 1st. This energizing lunar climax will likely have you feeling full of beans. Organize a get-together with friends, or why not use up that excess chi with a moon-lit work-out!?

With Aries' ruler Mars currently Rx, watch out for imploding emotions. Feelings fired up but nowhere to go? Don't go taking it out on your nearest and dearest!

4 OCT: PLUTO STATIONS DIRECT IN CAPRICORN

The tiny but powerful dwarf planet stations direct, calling forth all of those secrets and lies that have been bubbling away under the surface of life, since the end of April.

That metamorphosis you've been moving through? It's time to be reborn, hooray!

13 OCT: MERCURY STATIONS RETROGRADE

Mercury's last retrograde of the year begins in sultry Scorpio, where miscommunication could verge on the edge of manipulation and control. Be sure to check and double-check all information that you're given under this pesky planetary transit, lest understanding goes awry.

16 OCT: NEW MOON IN LIBRA

Sun and Moon align in air-sign Libra, kicking off a new lunar cycle that's just perfect for love!

Libra cares SO much what others are thinking and feeling (even more than itself!) that this energy brings care and co-operation to the max.

What kind of love do you want to manifest into your life?

Domestic bliss, marriage, and kids?
Wild, passionate sex?

Deep conversations with your lover, long into the night?

Exotic travel around the world with your soulmate?

All of the above?

Tonight's your night for a little lunar love magic!

22 OCT: SUN ENTERS SCORPIO (START OF SCORPIO SEASON!)

Swinging into mystical Scorpio, the Sun opens up 30 days of deep, devotional energy.

This is a great time to dig deeply into your closest relationship, your passion project, even a healing session of epic proportions. Scorpio doesn't do anything by halves.

Plus, as the most sexual of the signs, this solar season is just perfect for a little experimentation in the bedroom. What's your fantasy?

31 OCT: SAMHAIN (HALLOWEEN) & FULL MOON IN TAURUS

Oh, what divine timing!

Samhain is the annual feast day of the ancestors, the night when the veils are at their thinnest, and the descent into the shadowlands begins. Divination, ritual and spiritual connection of all and any kind are given a boost.

The 31st also sees the lunar cycle's peak, as the Moon reaches her full phase, in steady, earth-sign Taurus. Here, la Luna is exalted, so sensual, celebratory energy is at a high. Perfect for a party, a gathering or, if you dare, a seance...?

*In the Southern Hemisphere, this Celtic power-day corresponds with Beltane and the blooming peak of springtime fertility.

NOVEMBER

6 Universal Month (1 + 1 + 2 + 0 + 2 + 0 = 6)

THE 6 UNIVERSAL MONTH

Time to hunker down after a flighty and unstable October, as the energy of the number 6 takes hold.

Just like February, this month's vibe is family-focused, though we've come a long way since then, spiraling up through our personal and collective patterns of growth – and, of course, the skies are looking markedly different!

Communication is back on track as Mercury stations direct in Libra on the 3rd, lending an altogether more co-operative approach to family exchanges. The timing is great as, under a 6 Universal month, the weight of responsibility can weigh heavy. It needn't.

Got kids? Get them involved in the domestic side of life! And seek inventive ways to keep their interest piqued. The number 6 is abundantly creative and needs an outlet for its art, so don't neglect this side of yourself this month. Sure, the

NOVEMBER 2020 - THE BREAKDOWN

3 NOV: MERCURY STATIONS DIRECT

Hurrah! The planet of travel and connections puts paid to the last Rx of the year, and it's full steam ahead. If you've been held back by inertia, and the cosmic dragging of heels, then get back into gear - momentum is a-rising!

11 NOV: 11:11 PORTAL & NUMEROLOGY POWER DAY

The year's most powerful day of rapid, conscious co-creation. This once-a-year Numerology power day lines up all the 1s, to maximize your manifestational capabilities.

What are you wishing for?

13 NOV: FRIDAY 13TH, & MARS GOES DIRECT

Unlucky for some! But not for us - 13 is the number of the Goddess, and bursting with sacred feminine frequencies. Today, this is balanced by God-of-War and divine masculine prowess stationing direct in ruling sign Aries. Expect to move full steam ahead on projects that need an initiating push. At last!

But a word of warning peeps - keep those tempers in check.

15 NOV: NEW MOON IN SCORPIO

The most transformative New Moon of the year hits in mysterious Scorpio. Not one, but three totems belong to this sign - the Scorpion (obvs), the eagle and the phoenix. Each offers a potent route to transform (and transcend) anything you wish to leave behind.

Set intentions for rebirth.

21 NOV: SUN ENTERS SAGITTARIUS (START OF SAG SEASON)

The season of expansion begins, as the Sun switches signs entering free-flying Sagittarius.

As well as long-distance travel (holiday booking, anyone?) this sign rules knowledge and discovery.

What have you always wanted to know about?

What have you always wanted to learn?

For the next 30 days, the Sagittarian winds are behind you, as you dive into whatever new experiences and wells of knowledge have greatest appeal. Push yourself beyond your comfort zone.

28 NOV: NEPTUNE STATIONS DIRECT

Lucid dreaming? Planet of the subconscious, sleepy Neptune stations direct at the end of the month, bringing us out of our reverie.

From this point forward, the fog will lift and fact and fiction become SO much easier to discern (here's hoping!)

30 NOV: FULL MOON & LUNAR ECLIPSE IN GEMINI

Just managing to squeeze itself into the month of November, the first eclipse of the season arrives on the 30th.

Lunar eclipses (also known as blood moons) always occurs at the Full Moon, when Sun and Moon oppose. Here in Gemini, the spotlight falls onto how we connect, communicate and network with other people and the world.

Are your methods creative, constructive and beneficial?

Or do they tend to criticize, and break down bonds? (we're including self-talk here).

Use this powerful lunar peak as an opportunity to see inside your shadow.

DECEMBER

7 Universal Month (1 + 2 + 2 + 0 + 2 + 0 = 7)

THE 7 UNIVERSAL MONTH

NO matter how much you want to get ahead this month, December brings the frequency of retreat. The number 7 is introspective. It needs solitude and time for contemplation to really maximize its potential. So to make the most of this month, you're gonna have to carve out a little me-time.

In amongst the flurry of Sagittarius season (which we're still in 'til December 22nd) and not forgetting Christmas chaos, try to get back to the core of what it's all about. The 7 is a truth-seeker above all else. Meaning and truth will be your *raison d'être* this month, so don't skim over the surface.

And likewise, get real with the people you're close to. Be honest about what you need. Ask for space when you need it. Ask for straight answers when you need them.

COSMIC EVENTS

- 12 Dec** 12/12 Numerology Power Day
- 14 Dec** New Moon & Solar Eclipse in Sagittarius
- 15 Dec** Chiron Stations Direct in Aries
- 17 Dec** Saturn enters Aquarius
- 19 Dec** Jupiter enters Aquarius
- 20 Dec** Mercury enters Capricorn
- 21 Dec** Sun enters Capricorn & Winter Solstice & Jupiter Conjunct Saturn

Thank Goddess that the start of this 7 Universal Month is a clean sweep – very few notable astrological events mean that emotions should run smoothly and plans unhindered. Leaving plenty of time for some R & R. And don't feel guilty about it!

DECEMBER 2020 - THE BREAKDOWN

12 DEC: 12/12 NUMEROLOGY POWER DAY

An unusual but highly charged numerology power day hits on the 12th Dec, calling for the balance of sacred masculine and feminine energies within. Use this day to integrate both aspects as a way to empower and strengthen.

14 DEC: NEW MOON & SOLAR ECLIPSE IN SAGITTARIUS

We're halfway through the month before the first major astrological alignment hits (and it's a pretty hot one, at that!) The second eclipse of the season falls in Sagittarius, bringing us to the start of a new lunar cycle. But no ordinary new beginning – this is a huge opportunity to commit to something lifechanging.

The effects of this eclipse will ripple through the next six months, so choose your intentions wisely, and with heart.

15 DEC: CHIRON STATIONS DIRECT IN ARIES

Just a day later, the small but mighty asteroid Chiron stations direct. Over the last 4 months, he's been busy showing us how our greatest pain has the potential to become our greatest gift to the world. Not easy work. And now, any heavy, triggering shadow work thrust upon you since mid-July will begin to lift – hooray!

17 DEC: SATURN ENTERS AQUARIUS

Saturn has dipped his toe into Aquarius once already this year, whilst on his annual retrograde sojourn. But now flying in with full speed, the cosmic ringmaster will be here to stay, this time for three long years. Here in the future-forward sign of revolution, expect new technological breakthroughs, and the rallying of communities to smash the patriarchal paradigm that's been buckling already under Capricornian pressure. We can't wait.

19 DEC: JUPITER ENTERS AQUARIUS

Hot on Saturn's heels, another big player shifts into the water-bearer's sign just a couple of days later. Jupiter will remain here for a year, expanding our minds, amplifying our humanitarian instincts and generally breaking down barriers to progress. We can't wait for this one either!

21 DEC: SUN ENTERS CAPRICORN (START OF CAPRICORN SEASON) & WINTER SOLSTICE & JUPITER CONJUNCT SATURN

Arriving with a bang, the solstice is a powerful portal of spiritual connection.

In the northern hemisphere, it's the shortest day, and in the southern hemisphere, it's the longest. But regardless of where in the world you are, the veils are thin. Celebrate the light, or celebrate the dark. Both rule.

Capricorn season also begins on the solstice – ushering in 30 days of long-term vision and a belt-and-braces work ethic. This coincides with the last (and possibly most notable) major planetary aspect of the entire year.

Known as "The Great Conjunction", it happens only once every 19 years. Saturn and Jupiter come together at the second degree of Aquarius, bringing a big, bold, ambitious boost of cosmic energy.

This conjunction marks the end of a phase, and an extremely potent opportunity to rise up into a higher and more advanced level of existence.

What a way to close the year!
